Swiss Design

Adventerra combines the words “adventure” and “Terra,” the Latin name for our planet. It reflects our mission: to **create exciting games that help kids care for our world!**

We are **Adventerra Games**, a team of people sharing a passion for games, a love of nature, and a desire to make a positive impact on our planet. All of our games are designed in Switzerland, which has always been **recognized for its quality, precision, and reliability.**

Have fun & Save the Planet!

Our mission is to raise environmental awareness through play. We believe that making children aware of environmental themes can help them grow into better adults who are respectful of other people, animals, and the planet on which we all live. **Our games empower kids** to make better choices for a **green future!**

Eco-friendly & Sustainable

All of our games are **plastic-free** and use eco-friendly materials. They contain only **FSC-certified wood and paper, vegetable-based inks,** and recycled material. Everything in our products is 100% recyclable.

**100%
PLASTIC-FREE**

**RECYCLED
& RECYCLABLE**

**FSC-CERTIFIED
WOOD & PAPER**

**VEGETABLE
INKS**

Award-Winning Games

We have won more than 90 awards to date, including some of the most prestigious Toy Industry Awards like the **Toy Industry of Europe's Play for Change Silver Award**, **Good Housekeeping's 2021 Top Toy Award** and seals of approval from numerous recognized Parenting Institutions like the **Mom's Choice Awards**, **The National Parenting Center**, etc.

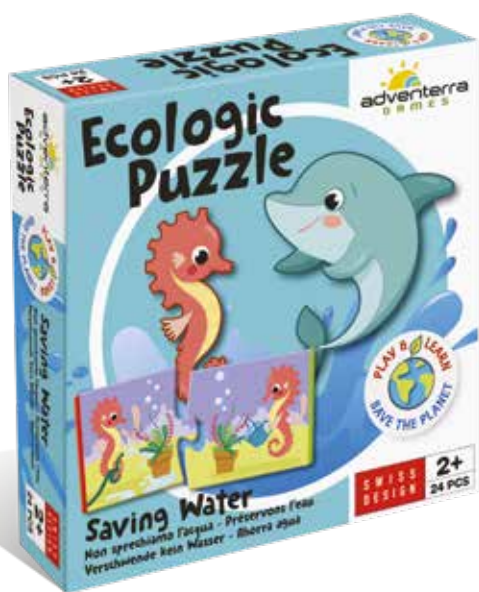

STEM Toys

Our puzzles & games spark creativity, while helping children develop science, technology, engineering, math, and logic skills: this is why **all of our products have been authenticated by STEM.org**.

Ecologic Puzzle Saving Water

Game explanation

With these mini puzzles, children learn about the importance of water, and how to conserve this precious resource.

The pieces feature coloured edges and self-correcting joints that help players to match them. On the red-edged pieces, adorable sea creatures show how to waste water in everyday life, but on the green-edged pieces, they show ways that children can save water!

Helps develop

Observation skills

Ecologic Puzzle

Respect the Earth

While building these mini puzzles, children discover daily actions they can take to help the Earth. Players match pairs with the help of self-correcting joints and the backgrounds and characters depicted on the pieces. On the red-edged pieces, a diverse group of cute kids demonstrates common habits. But on the green-edged pieces, they show better habits to protect the planet!

PowerHaus

Game explanation

Players live in a house that loses heat and wastes a lot of energy, and their goal is to renovate it and reduce their utility bills. By drawing cards from inside the house, they learn habits that save energy. While exploring the city's stores, they discover products and services they can purchase to make the home more efficient. On each turn, they gain or lose money depending on the investments they've made, and the winner is the one who makes the best choices for their wallets and the world!
