

Respect the Earth

Educational Eco Guide

- ❌ **DON'T:**
Throw all trash into the same bin.
- ✅ **DO:**
Recycle paper, glass, plastic, and metal.

If you sort out your recyclables, they can be made into something new. For example, old cans can be turned into bicycles, and old paper can be used to make puzzles - just like this one!

- ❌ **DON'T:**
Buy plastic water bottles.
- ✅ **DO:**
Drink water from the faucet.

A lot of plastic bottles end up in the ocean, where marine animals mistake them for food. Yikes! Skip the plastic to keep the oceans clean. (If you are worried about water quality, you can use a filter.)

- ❌ **DON'T:**
Leave your trash on the beach.
- ✅ **DO:**
Pick up trash at the beach.

Turtles, birds, fish, and other sea creatures can get tangled in the trash, making it hard for them to swim or fly. Clean up the beach to keep them safe!

- ❌ **DON'T:**
Leave the faucet on while brushing your teeth.
- ✅ **DO:**
Turn the faucet off while brushing your teeth.

Brush, brush, brush your teeth, but don't forget to turn off the water while you're brushing. This can save up to 18 liters of water each day!

- ❌ **DON'T:**
Drive a gas-powered car everywhere.
- ✅ **DO:**
Ride a bicycle when you can.

A car powered by gas creates pollution (this means it makes the land, water, and air dirty). A bicycle won't pollute - and it's good exercise! So, it's best to use your bike instead of the car whenever you can.

- ❌ **DON'T:**
Hurt plants.
- ✅ **DO:**
Care for plants.

Flowers and other plants are not only beautiful, but they also clean our air and provide food and homes for butterflies, bees, bats, birds, frogs, rabbits, and other animals. So, it's smart to help them grow!

✗ DON'T:
Throw away leftover food.

✓ DO:
Save leftover food.

If you waste food, you also waste all the land, water, effort and energy that went into making that food. Use your leftovers in tasty meals like soup or put scraps into the compost to make soil for the garden.

✗ DON'T:
Fall asleep with the TV on.

✓ DO:
Turn the TV off when you are done.

A TV needs energy to run. Energy is often made from natural resources such as coal, gas, and oil. There is only a limited amount of these resources, so it is important to save as much energy as possible.

✗ DON'T:
Read with a lamp on during the day.

✓ DO:
Read in the sunlight.

It's easy to flip a switch and turn on the lights, but making electricity is not so easy. It often creates pollution, which makes the planet hotter and dirtier. By letting in sunlight, you'll use less electricity.

✗ DON'T:
Take a bath.

✓ DO:
Take a short shower.

Bath time can be fun, but it wastes a lot of water! A 10-minute shower saves more water than filling up the bathtub.

✗ DON'T:
Buy produce wrapped in plastic.

✓ DO:
Pick your own fruits and vegetables.

Food in stores is often packaged in plastic, which causes pollution. If you pick your own fruit and vegetables, you can use baskets, boxes, or cloth bags instead. Fresh produce is also healthier and more delicious!

✗ DON'T:
Throw away toys.

✓ DO:
Donate unwanted toys.

If you never play with a toy, don't throw it out. If it is still in good shape, it makes no sense to waste it! It's smarter to donate your old toy to someone who will enjoy it.
